SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations*, the NRC is making available for public inspection, final Supplement 57 to the GEIS regarding the renewal of Exelon Generation Company, LLC, operating licenses NPF-11 and NPF-18 for an additional 20 years of operation for LSCS. Draft Supplement 57 to the GEIS was noticed by the NRC in the *Federal Register* on February 11, 2016 (81 FR 7378), and was noticed by the Environmental Protection Agency on February 19, 2016 (81 FR 8490). The public comment

period on draft Supplement 57 to the GEIS ended on April 4, 2016. The NRC received 11 public comment submissions from State and Federal government organizations, public interest organizations, private citizens, and the licensee. The comments received on the draft Supplement 57 were addressed in the final Supplement 57 to the GEIS.

II. Discussion

As discussed in Chapter 5 of the final Supplement 57 to the GEIS, the NRC determined that the adverse environmental impacts of license renewal for LSCS are not so great that preserving the option of license renewal for energy-planning decision makers would be unreasonable. This recommendation is based on: (1) the analysis and findings in the GEIS; (2) information provided in the environmental report and other documents submitted by Exelon Generation Company, LLC; (3) consultation with Federal, State, local, and Tribal government agencies; (4) the NRC staff's independent environmental review; and (5) consideration of public comments received during the scoping process and on the draft Supplement 57 to the GEIS.

Dated at Rockville, Maryland, this 26th day of August, 2016.

For the Nuclear Regulatory Commission.

James G. Danna, Chief,
Environmental Review and Projects Branch,
Division of License Renewal,
Office of Nuclear Reactor Regulation.
